FIG. 21—Bedouins of Wadi Hajr. Note the attire and appearance: bare feet or sandals, short sarong, cartridge belt; curved dagger; long, black, glistening, oily hair; ever present musket. To the stocks of their antiquated guns, goat skulls are frequently attached, as these are thought to provide greater comfort than the original design.

laid out radially from the well so that surface drainage will converge on it from a wide area.

415 401 483 To transport water, Bedouins use bags of uncut goat skins, tied firmly at the leg and neck openings. For drawing well water, the skin is fashioned into a bucket and attached to a rope passing over a pulley in a crudely constructed scaffolding of palm logs lashed together with coconut-fiber cord. The bucket is raised and lowered by donkeys, cattle, or slaves, with the assistance of an appropriate harness. To augment the lifting power applied to each bucket, it is customary to excavate an incline downward from the mouth of the well, equal in length to the depth of the water table, and it is along such a trench that man and beast plod long, weary hours each day. When a bulging and leaking skin has been lifted slightly above the welltop, it is pulled over and lowered into a catchment basin connected with the local irrigation system.

THE CARAVANS

492 438 439 Many Bedouins, not engaged in agriculture or herding, find occupation in the camel transport system of the Hadhramaut. A man
